OVER 100 STREETS TO BE TREATED WITH ASPHALT REJUVENATOR

WHAT/WHEN: During the next 30 days, over 100 Cincinnati streets in 21 Cincinnati communities will be treated in the 2003 Pavement Rejuvenation program. The work is scheduled to begin **Monday, October 20, 2003**. The contractor is **Pavement Technology, Inc.** The streets will be completed in phases, and may be closed temporarily to through traffic. Police will also enforce parking restrictions.

Crews will use a penetrating sealer that replaces oils dried from the pavement by the heat of manufacturing and the sun. The process seals and rejuvenates the pavement, making it weather-resistant again.

All streets with low traffic volumes rehabilitated in the 2002 Street Rehabilitation Program will receive the treatment.
